WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

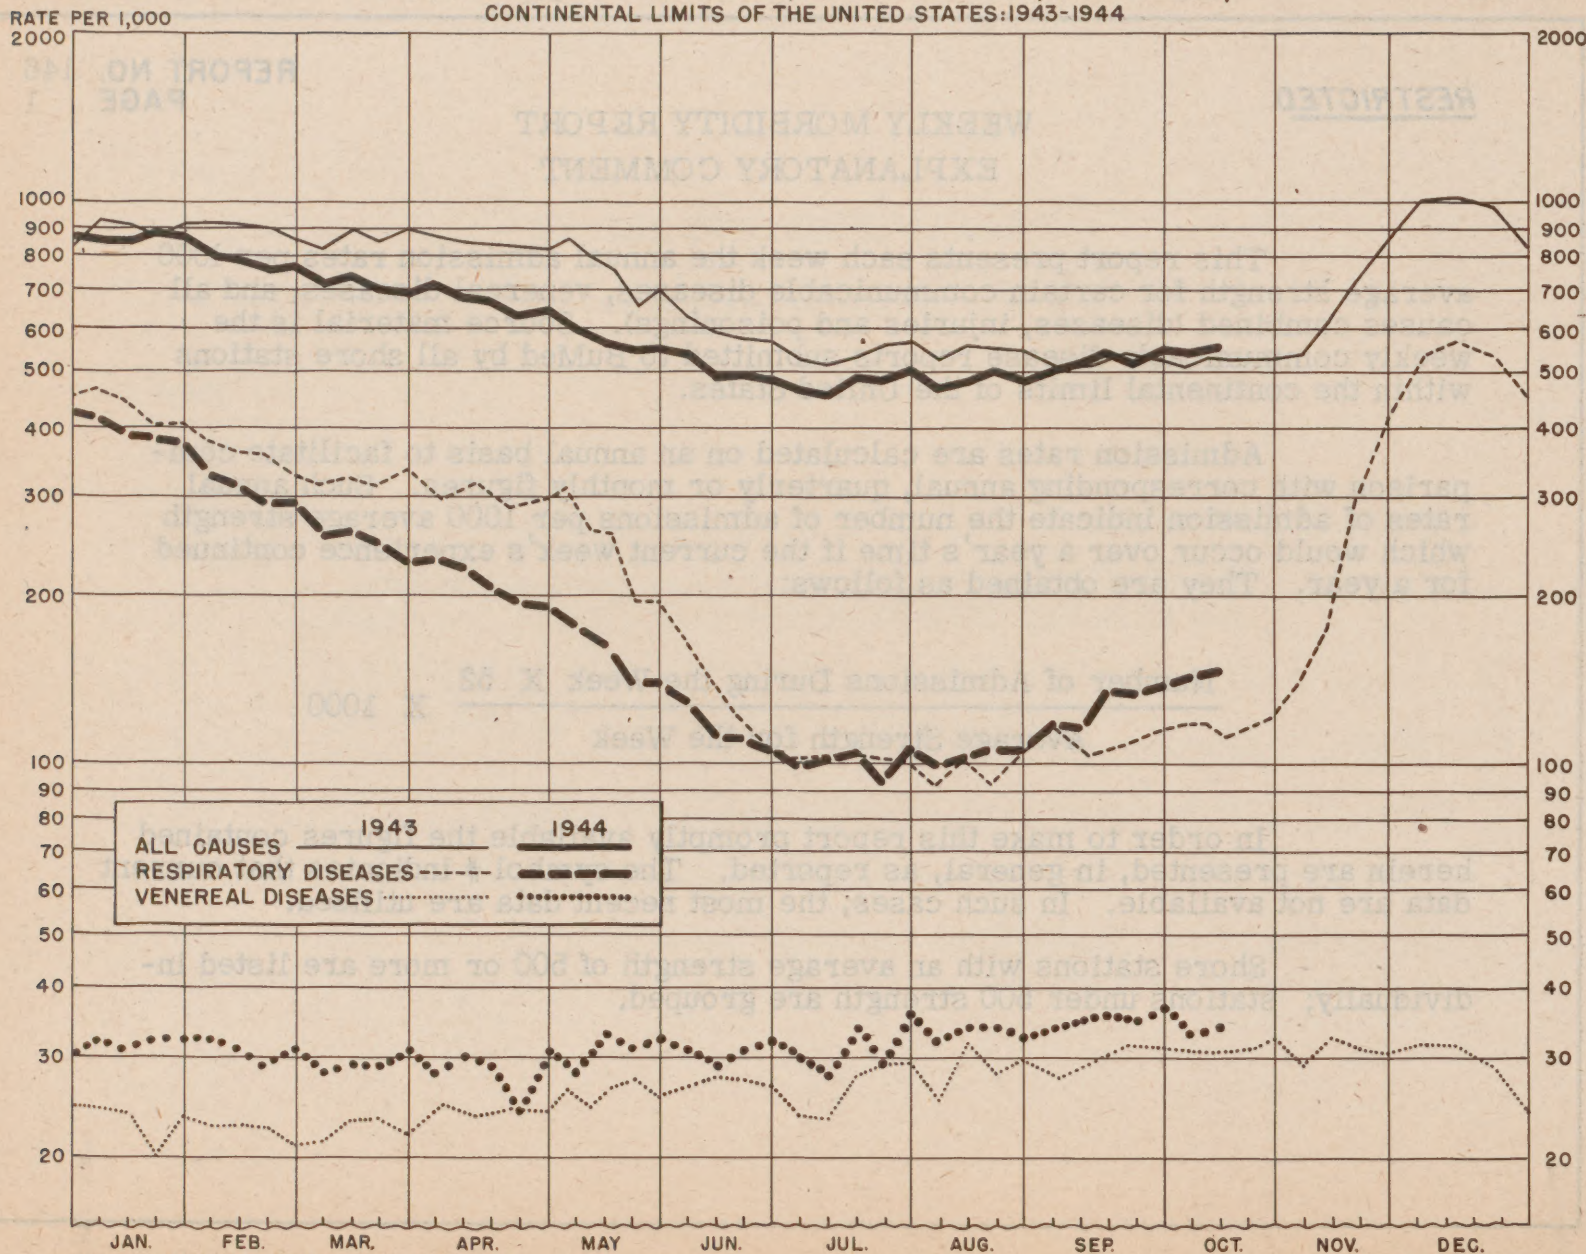

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

RESTRICTED

FIGURE 1
ANNUAL ADMISSION RATES PER 1,000 AVERAGE STRENGTH, BY WEEKS
FOR CERTAIN RESPIRATORY DISEASES, VENEREAL DISEASES, & ALL CAUSES,
CONTINENTAL LIMITS OF THE UNITED STATES: 1943-1944

REPORT NO. 146
PAGE 2

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

CURRENT TRENDS

Week Ending 14 Oct 1944

The admission rate for All Causes rose this week. The curve stands above the 1943 curve for the corresponding period. The highest rate (971) was reported for the Potomac and Severn River Commands, the lowest (435) for the 7th District.

The upward trend in the respiratory disease curve continued this week. Rates of over 100 were reported in all Districts except the 7th, 8th, and 12th Districts. The 13th District reported the highest rate (337), the 7th District the lowest (82).

The venereal disease curve rose slightly this week, and still stands above the 1943 curve for the corresponding period. The highest rate (51) was reported for the 4th District, the lowest rate (23) for the Potomac and Severn River Commands.

Influenza and Catarrhal Fever. The upward trend in the curve for these diseases halted this week and a slight drop was recorded. The curve continues to stand below the 1943 curve for the corresponding period. The highest rate (154) was reported for the Potomac and Severn River Commands, the lowest (57) for the 7th District.

Pneumonia--Broncho and Lobar. The rate for these diseases rose to 2 this week. This rate is favorable to the rates of 3.1 for 1942 and 3.8 for 1943 during the corresponding periods. The 1st District reported the highest rate (5), the lowest (0.4) for the 11th District.

Pneumonia, Atypical. The curve for atypical pneumonia rose this week and stands well above the 1943 curve for the corresponding period. The highest rate (9) was reported for the 11th District. The 12th District reported no cases.

Tonsillitis and Pharyngitis, Acute. The curve for these infections rose sharply this week and now stands at the May level. The 13th District continued to report the highest rate

RESTRICTED

WEEKLY MORBIDITY REPORT

REPORT NO. 146
PAGE 4

CURRENT TRENDS --CONTD.

(224). The lowest rate (17) was reported for the 8th District.

Rheumatic Fever. For the fifth consecutive week the rate for this disease has stood at 1. This compares favorably with the rate of 1.5 for the corresponding period of 1943. By far, the highest rate (12) was reported by the 13th District. The 3rd, 4th, and 7th Districts and the Potomac and Severn River Commands reports no cases.

Scarlet Fever. The curve which had been flat at 6 for 4 weeks rose this week and is well above the curves for 1942 and 1943 for the corresponding periods. The highest rate (100) was reported for the 13th District; the Naval Training Center at Farragut, Idaho, reported, by far, the largest number of cases. The 1st, 5th, 6th, 7th, and 8th Districts reported no cases.

Cerebrospinal Fever, Meningococcic. Although the rate for this infection rose slightly this week to 0.09 the curve continues to stand below the 1943 curve. In only the 5th, 9th, and 13th Districts were cases reported. The highest rate (0.53) was reported for the 13th District.

Malaria. For the fourth consecutive week the curve for this disease remains flat at the rate of 3. The 1944 curve continues to stand below the 1943 curve for the corresponding period. The 1st District reported the highest rate (12). The 7th District and the Potomac and Severn River Commands reports no cases.

Measles. The curve for measles rose slightly and continues to stand above the 1943 curve for the corresponding period. The 13th District reported the highest rate (3). The 4th, 6th, and 7th Districts and the Potomac and Severn River Commands reported no cases.

Poliomyelitis, Anterior, Acute. Two new cases of poliomyelitis were reported for the week by Continental Shore Stations--both occurred in the 9th District. The cumulative total of poliomyelitis cases reported from all Continental stations Jan. 1 to Oct. 14 stands at 55. *

REPORT NO. 146
PAGE 5

CURRENT TRENDS --CONTD.

The general trend continues downward for cases reported in the United States. The U. S. Public Health Service reports for the week show the civilian cases in the six States with the highest incidence, distributed as follows:

New York	234	Illinois	36
Ohio	60	Massachusetts	27
Pennsylvania	60	New Jersey	26

*Several of these cases were not reported on Weekly Morbidity Report
NavMed-172.
